Collaborative Environment for Experts on Energy Efficiency in Buildings in the UNECE region

LOGIN

This Collaborative Environment aims to enhance the network of experts from public and private sectors on energy efficiency in buildings in the UNECE region. This Collaborative Environment is composed of two products:

1. Online database of experts on energy efficiency in buildings, and
2. Online collaborative tool that helps the experts to strengthen their capacities by sharing knowledge and expertise on energy efficiency in buildings.

It is open for stakeholders involved in the energy efficiency projects. The target group includes policy makers in the field of housing and construction and energy efficiency at the regional, national, and municipal levels, architects, building contractors, energy service companies, representatives of academia conducting research and training in the field of energy efficiency of buildings, representatives of international organizations and civil society and other experts in this area.
